CYBERNET

Here's What We Do

Cybernet engineers purpose-built computing solutions that deliver reliability, performance, and safety in the most demanding environments, whether it's at the patient's bedside or in the operating room

Medical-Grade Defined

### Certifications & Safety
IEC 60601-1, UL 60601-1 recognized

Clinical Reliability
Proven < 0.5% 7-year lifecycle failure rate

Infection Control
IP65-rated, fanless design for easy sanitation

US-Based Tech Support
Lifetime phone support

Healthcare Verticals

Hospital

Telemedicine

Long-Term Care

Pharmaceutical

Radiology

From the smallest tablet to the largest panel PC, each of our medical computers provides unmatched features, reliability, and performance.

949-600-8000

Why Cybernet?

Vertical Integration

End-to-end OEM control: fast customization, reliable supply, best in industry reliability. World-class tech support

Seamless Mounting

Works on standard medical carts & arms; no adapters needed

Battery Powered

Battery powered flexibility when powered carts are too expensive or heavy

Common Solutions

On Powered Carts

Medical grade all in one PC on a standard medical powered cart

On Non-Powered Carts

Battery powered medical grade all in one computer on a non powered cart. A lightweight mobile PC with a swappable battery

Powering Other Devices

Battery powered medical grade display that powers a thin client PC and printer on a medical cart

Telemedicine

Battery powered medical grade all in one computer for telemedicine that powers cameras, headsets, and accessories
