

CyberMed Rx 10.1" Rugged Medical Tablet

First medical tablet with completely antimicrobial exterior including antimicrobial touchscreen.

www.cybernetman.com/en/rx-rugged-medical-tablet

CyberMed Rx Rugged Medical Tablet

100% Antimicrobial Exterior

Completely Antimicrobial Exterior

The entire exterior of the tablet including the Gorilla Glass touch-screen is antimicrobial. With an IP65 sealed front bezel and anti-microbial coating that encompasses the entire medical tablet you can minimize the spread of pathogens.

Dual Hot Swappable Batteries

Works for up to 12 hours without the need to swap batteries. Battery status on both front and back of unit. Swap out a battery on the fly without turning off the unit.

Rugged Drop Protection

This rugged medical tablet has been tested to withstand drops of up to 5 feet and is in compliance with the MIL-STD-810G (516.6-VI. Transit drop test).

It is a true rugged tablet designed for healthcare professionals.

Intel 5th Generation CPU

Supported by the latest Intel 5th generation processors - including i3, i5 & i7 with VPro - to satisfy the most power demanding applications.

Integrated 2D Barcode Scanner with Single-handed Scanning

With the integrated barcode scanner, patient wristbands, medication and just about any other type of barcode can be scanned directly from the CyberMed Rx.

Operate the scanner with one hand leaving the other hand free.

Desktop Docking Station with DC Jack & Ports

The desktop docking station recharges the batteries on the tablet and also comes with a two battery charging cradle so you can easily "hot swap" the tablet's batteries.

The docking station comes with a DC jack, 2 x USB 1.1 ports with 1 KV isolator, an RS232 port for legacy hardware, 100Mbps NIC and an HDMI port.

VESA Mountable

The CyberMed Rx medical tablet comes with a VESA Mounting Bracket with the standard VESA Mount options.

The VESA Mount has two USB ports an RS232 port, a NIC port, HDMI and a DC Jack.

Additional Features

- RFID Reader / Imprivata SSO
- CAC / Smart Card Reader
- Medical Grade EN60601-1
- Integrated Biometric Reader

Ports

- USB, Ethernet & HDMI Ports
- Legacy Port available on Docking Station and VESA Mount

Battery Charging Station

Charge up to six batteries simultaneously.

With the hot swappable batteries feature, you can replace the batteries from the CyberMed Rx and charge the removed batteries in the battery charging station.

This allows you to use the CyberMed Rx continuously without plugging it in.

About Cybernet Manufacturing

Since 1996, Cybernet has stood for reliability, durability and built-to-order All in One PCs. To ensure reliability, durability & quality, we use military grade components in our All in One PCs for the healthcare, industrial & business markets.

Cybernet is the pioneer in high-performance, all-in-one PC technology. We have focused our design and manufacturing efforts on space saving IT solutions, customized for our customers' unique environments and computing needs.

Customer Support

Our customer support is one of the best in the industry. Cybernet believes in building relationships with our customers, and we understand the challenges facing IT departments.

All of our products are backed by U.S. Technical Support and local RMA service at our headquarters in Irvine, CA.

Our goal is to provide the best customized solution for every customer, backed by our team of U.S.-based sales and tech support representatives.

Cybernet Develops World's First Completely Antimicrobial Medical Grade Tablet

The revolutionary CyberMed Rx medical tablet was unveiled today at this year's HIMSS Conference

IRVINE, Calif. – March 1, 2016 – Cybernet proudly unveiled the CyberMed Rx today, the first medical tablet with a completely antimicrobial exterior and antimicrobial touchscreen. This antimicrobial feature, coupled with the rugged computing capabilities of an industrial tablet, is poised to usher in a new era in advanced healthcare computing.

“The CyberMed Rx is the next step in the evolution of medical tablets”, said Hossein Asadi, CEO, Cybernet. “We have strived to meet the needs of the healthcare community by coming up with the most state-of-the-art medical tablet available in the market today.”

The CyberMed Rx is geared towards providing medical personnel with a significantly improved computing experience in sterile environments. It combines the capabilities of a medical grade tablet, with the rugged features of an industrial computer, to deliver a level of functionality as yet unseen in traditional medical tablets. Powered by 5th Gen Intel Core i5/i7 processors, the Windows tablet comes with a 10.1” high resolution, anti-glare screen with Corning® Gorilla® Glass technology, up to 10 hours of battery life, and VESA mounting capabilities.

“The CyberMed Rx is equipped with a host of features including single-handed barcode scanning, dual hot swap batteries, RFID and smart card readers, and sophisticated wireless technology, which together with the completely antimicrobial exterior, make the tablet ideal for use in operating rooms, clean rooms, intensive care units, and any other location where the spread of microbes could be an issue,” Ali Bagheri, Global Senior Vice President, Cybernet, added.

The CyberMed Rx medical tablet represents a crucial juncture in the healthcare computing industry, with features that can revolutionize the medical equipment industry if implemented on a large scale. It will be unveiled for the first time at the 2016 HIMSS Conference that commences in Las Vegas on February 29.

The CyberMed Rx can be built to order with a considerable array of options. Interested parties can configure their units online and request a custom quote on the Cybernet website.

About Cybernet:

Cybernet Manufacturing is a global manufacturer of all-in-one PCs and tablets built with military grade components to ensure durability and reliability. Cybernet serves a variety of vertical markets such as health care, industrial, business, banking, and education. Cybernet is privately held, and is headquartered in Irvine, CA, with operations in Taiwan, China, and Europe. The company employs 400+ employees worldwide. Cybernet Manufacturing

When Reliability Matters

All in One Computers & Tablets

Built with Military Grade Components
for Reliability & Durability

- Medical Grade Computers & Tablets
- Enterprise Grade Computers & Tablets
- Industrial Rugged Mini PCs & Panel PCs

Cybernet Manufacturing

Since 1996, Cybernet has stood for reliability & durability with a MTBF rate of less than 2%. To ensure reliability, durability & quality, we use military grade components in our All in One PCs for the healthcare, industrial & business markets.

Cybernet is the pioneer in high-performance, all-in-one PC technology. We have focused our design and manufacturing efforts on IT solutions, customized for our customers' unique environments and computing needs.

Built To Order

A Cybernet computer is highly customizable built to meet the needs of the purchaser. We offer free hard drive imaging so that when the computer reaches you, it is virtually ready to go when you take it out of the box.

Additional PC purchases can be set up to be identical to the units already purchased saving you time and money.

Customer Support

Our customer support is one of the best in the industry. Cybernet believes in building relationships with our customers, and we understand the challenges facing IT departments.

All of our products are backed by U.S. Technical Support and local RMA service at our headquarters in Irvine, CA.

Our goal is to provide the best customized solution for every customer, backed by our team of U.S.-based sales and tech support representatives.

Warranties

Cybernet has one of the most robust warranties in its market. Medical and business computers come standard with a 3-year warranty with an option to extend it up to 5 years.

The Cybernet Advantage

- 3-5 Year Product Life Cycle
- Original Design Manufacturer
- U.S. Technical Support
- U.S. Manufacturing Facility
- Global Presence

Over 20 years in the AIO industry serving the healthcare, enterprise and industrial sectors.

Creative Solutions to Complex Problems

Sample Clients

Sample Testimonials

“ I love working with Cybernet. The team stays in touch and there is low need for support because the hardware has been very reliable.

J.L., Senior System Engineer
VCU MEDICAL CENTER

“ Providing access to EMR software with the vicinity of the patient allowed staff members to provide the excellence in care that Athena Health Care promises its patients and their families.”

T.P., IT Director
ATHENA HEALTHCARE SYSTEMS

“ Choosing Cybernet’s all-in-one PCs made my job a lot easier; they performed flawlessly during the implementation and continue to reliably run our new medical record software.

K.M.P., Information Technology
Director
Hacienda Healthcare

“ The CyberMed T10 tablet and CyberMed MP15T with touch screens have the ideal features, performance, and reliability to power our leading-edge FES systems.

A.B., CEO
Restorative Therapies

Our Green Initiative

Cybernet is deeply committed to green practices to protect our environment, including:

- Using recyclable materials in manufacturing and packaging
- Meeting Energy Star and related standards to conserve energy
- Offering take-back recycling and refurbishing programs for our PC products

Cybernet Recycling Program

Get credit for your eligible Cybernet device

We offer a Trade-In Program for clients to receive credit on an older model towards the purchase of a new one. A trade in of a previous Cybernet system not only keeps the unit out of the local landfill, it also extends its usability to someone else after we refurbish it.

We will also recycle your old PC for you, free of charge. These initial steps are only the beginning. Cybernet continues to care deeply about our environment.

Compliance

As a company, we have taken steps to ensure both our products and our practices are environmentally sound. All our carton materials, including cardboard and foam, are made from recyclable materials and are fully recyclable themselves.

We are committed to manufacturing products that not only meet and exceed computing expectations but also conserve energy.

EPEAT Program

All of Cybernet's all-in-one PCs carry ratings of EPEAT Gold or Silver. Our iOne-GX45, iOne-H5, iOne-G4 have EPEAT Gold ratings, and our iOne-MP PCs and ZPC PCs carry an EPEAT Silver rating.

RoHS

Our products are RoHS compliant. By meeting the RoHS directive, Cybernet demonstrates a commitment to manufacture and supply products that protect environmental interests. This means all parts of our technology, including the metal, plastic, components, and plastic circuit boards are recyclable as well.

Highly Customizable Computers

Built to Order

- Computers that are completely customizable to your specifications.
- Waterproof. Shockproof. Dustproof.
- Optional Integrated CAC and MSR, RFID, Biometric Reader.
- VESA Wall Mountable.
